Getting Started with AWS Cloud Workspace

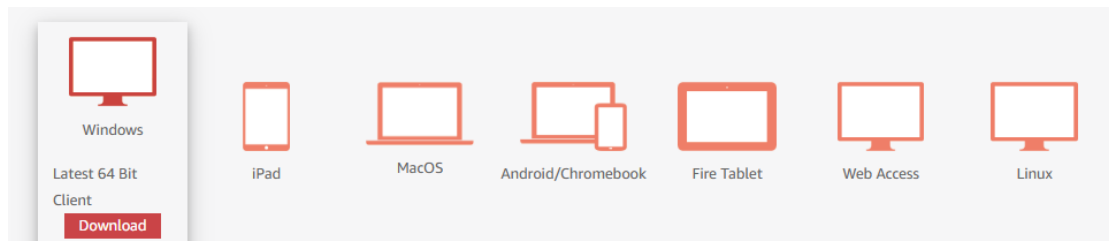

Jason Molaison - 2024-12-10 - [General Support](#)

The below steps will guide you through the setup of the AWS Cloud Workspace on your device.

However, if you simply need quick access on the go, you can visit the website webclient.amazonworkspaces.com

To install the client software on your device, visit the website clients.amazonworkspaces.com

Here you will select which platform you are using, to install the appropriate client software. For example, if you are using a Windows machine, you will hover over Windows, and select Download on the “Latest 64-Bit Client”.

This should initiate the software download. After the download is complete, you can simply run the install and follow the onscreen prompts.

**Note - You should NOT need to select the driver install for USB redirection.*

Once the installation is complete, run the Amazon Workspaces application. It may take a minute to launch. The first time you run the program, you will need to enter the provided registration code, then click Register.

To get started, enter the registration code provided to you by your administrator.

After the registration is complete, simply enter your provided username and password, then click Sign In.

Please log in with your tccws credentials

Sign In

It may take a few minutes to complete, but you should then be presented with your Workspaces Desktop.

If have any issues, we are here to help. Simply send an email to helpdesk@gtscomp.com for assistance.
